## Susdrain: SUDS Video

**“What is Susdrain? – [www.susdrain.org](http://www.susdrain.org)**

Susdrain is an exciting new community that provides a range of resources for those involved in delivering sustainable drainage systems (SUDS). With the need for SUDS greater than ever before, Susdrain provides up-to-date guidance, information, case studies, videos, photos and discussion forums that help to underpin the planning, design, approval, construction and maintenance of SUDS”

Walls

Pond

A vertical stream of water cascading down, surrounded by green foliage. The water is clear and bubbly, with many small droplets and bubbles visible. The background is a soft-focus green, suggesting a natural outdoor setting. In the bottom right corner, there is a bright green rectangular box with the text "Rain chain" written in white, sans-serif font.
